1. Introduction & What This Tool Does

GST Reconciliation Tool is a desktop application built for every professional who handles GST compliance. It eliminates the repetitive, error-prone work of manually consolidating GST return data and performing monthly/quarterly reconciliations across GSTR-1, GSTR-3B, GSTR-2B, CMP-08 and GSTR-4A.

The tool reads raw files downloaded directly from the GST Portal — PDFs for GSTR-1, GSTR-3B and CMP-08, and Excel files for GSTR-2B and GSTR-4A — and produces clean, structured consolidated workbooks and a final Reconciliation Workbook in a single run.

Capabilities

- Parses GSTR-1, GSTR-3B and CMP-08 PDFs for any Financial Year
- Consolidates GSTR-2B and GSTR-4A Excel and produces ITC summary sheets
- Generates Turnover Recon, ITC Recon, and E-Credit Ledger summary workbook
- HSN summary (Section 12) extraction and aggregation
- GST-standard Excel formatting: colour coding, freeze panes, tab colours
- GSTR-1A (amendment return) support with optional folder picker
- Session-aware — remembers GSTIN, FY, and folder paths per client
- Dual logger: clean user.log + full debug.log for diagnostics

What the Tool Does NOT Do

- Does not file returns or connect to the GST Portal in any way.
- Does not transmit any data to any server, cloud, or third party.
- Does not require an internet connection during processing.
- Does not require Python or any other software to be installed separately.

■ Data Privacy — Designed with DPDP Act 2023 Principles: All processing happens entirely on your local computer. Your GSTIN, client information, return data, and output files never leave your machine. No analytics or telemetry of any kind are collected.

2. System Requirements

No Python or any other software needs to be installed separately. The installer is fully self-contained.

Component	Requirement
Operating System	Windows 10 or Windows 11 (64-bit)
RAM	Minimum 4 GB (8 GB recommended for large FY datasets)
Disk Space	500 MB free (for installation and temporary files)
Display	1280 × 720 minimum resolution
Excel	Microsoft Excel 2016 or later (for viewing output files)
Internet	Not required for processing.

3. Installation — Step by Step

Step 1 — Download

Download GST_Recon_Tool_Setup.exe from the link provided. Save it to your Downloads folder or Desktop.

Step 2 — Run the Installer

Double-click **GST_Recon_Tool_Setup.exe**. If Windows shows a '*Windows protected your PC*' screen, click **More info** then **Run anyway**. This warning appears because the app is not code-signed — it is safe to proceed.

Step 3 — Follow the Setup Wizard

Click **Next** on the Welcome screen. Accept the default installation location (**C:\Program Files\GST Recon Tool**) or choose a custom path. Tick Desktop and Start Menu shortcuts as preferred. Click **Install** and wait ~30 seconds.

Step 4 — Launch

Tick '*Launch GST Recon Tool now*' on the final screen and click **Finish**, or double-click the Desktop shortcut.

■ Windows Defender SmartScreen Warning: The 'Windows protected your PC' warning is normal for internal tools. Click 'More info' then 'Run anyway'. The file is safe.

4. First-Time Setup & Session Management

4.1 Creating Your First Session

On first launch, the tool opens to the Startup screen. Select the Financial Year from the dropdown (e.g. FY 2025-26) and click **Start**. You will arrive at the Main Menu. No further setup is needed.

Your session — client name, FY, GSTIN, and all folder paths — is saved automatically after the first successful run and pre-loaded on next launch.

4.2 Managing Multiple Clients

The tool supports unlimited client sessions. Each client's data and folder paths are stored independently. Create a new session via **Change Client / FY → New Session**.

- Each session is identified by client name and financial year.
- Switching between clients is instant — all folder paths are restored automatically.
- Session data is stored locally; no data is shared between client sessions.

4.3 Switching Financial Years

Go to **Change Client / FY** and use the FY dropdown to switch. A new session is created for the new FY with blank folder paths. The previous FY session and its output files are preserved.

Action	Where to Find It	Notes
Create new client	Change Client / FY → New Session	Select FY and Click start session
Switch to existing client	Change Client / FY → Switch to another client → Search Bar	Search using the GSTN/Name → Select from dropdown → click switch. All paths restored automatically.
Change FY (same client)	Change Client / FY → FY dropdown	New session created for new FY
Edit folder paths	Change Client / FY → Edit paths	Update without re-running

5. How to Use the Tool

5.1 Option A — Reconciliation Engine (Recommended)

Use **Reconciliation Engine** to process everything in a single run — all Mirror Engines followed by GST Reconciliation. Recommended for month-end or year-end processing when all return files are available.

1. Click Reconciliation Engine from the Main Menu.
2. Select No — run Mirror Engines first, then Reconciliation.
3. Browse and select your GSTR-1 PDF Folder, GSTR-3B PDF Folder, and GSTR-2B Excel Folder.
4. If you have GSTR-1A amendment PDFs, toggle Yes — I have GSTR-1A PDFs and browse to that folder.
5. Select the Output Folder where all files will be saved.
6. Click Run and watch the live progress log.
7. When complete, click Open Output Folder to access the six generated files.

■ Four Files Produced: FY_2025-26_GST_Recon_<GSTIN>_Consolidated.xlsx | FY_2025-26_GSTR1_<GSTIN>_Consolidated.xlsx | FY_2025-26_GSTR2B_<GSTIN>_Consolidated.xlsx | FY_2025-26_GSTR3B_<GSTIN>_Consolidated.xlsx.

5.2 Option B — Individual Mirror Engines

Use when you need to re-run only one return type after adding a missing month's PDF or correcting a source file.

- Click **Mirror Engines** from the Main Menu.
- Select GSTR-1 Mirror, GSTR-3B Mirror, GSTR-2B Mirror CMP-08 Mirror, or GSTR-4A Mirror.
- Browse to the input and output folders. Click Run.

5.3 Option C — Reconciliation Only

Use when all consolidated files already exist and you only need to regenerate the Reconciliation Workbook.

- Click Reconciliation Engine → select Yes — mirrors done, run Reconciliation only.
- Browse to the single folder containing all consolidated Excel files (output of mirror engines).
- Select the output folder and click Run.

6. Input File Requirements

6.1 GSTR-1 PDFs

Download from: GST Portal → Login → Services → Returns → Returns Dashboard → Select period → GSTR-1 → View Summary → Download PDF

- One official filed return PDF per month (April to March).
- All months for the FY must be in the same folder.
- Any filename is fine — the tool reads GSTIN and return period from inside the PDF.
- Use only official portal downloads — not scanned copies or printouts.

6.2 GSTR-3B PDFs

Download from: GST Portal → Login → Services → Returns → Returns Dashboard → Select period → GSTR-3B → Download PDF

- Same requirements as GSTR-1 — one PDF per month, all months in one folder.

6.3 GSTR-2B Excel Files

Download from: GST Portal → Login → Services → Returns → Returns Dashboard → Select period → GSTR-2B → View → Download GSTR 2B Details (Excel)

- Format: Excel (.xlsx) — the standard GST Portal download format.
- One file per month/quarter — all months/quarters in a single folder.
- Do not open and re-save these files in Excel before processing.

6.4 GSTR-1A Amendment PDFs

Download from: GST Portal → Login → Services → Returns → Returns Dashboard → Select period → GSTR-1 → Download PDF

- Collect GSTR-1A PDFs separately.
- Download only the STANDALONE GSTR-1As and not the consolidated GSTR-1As
- Enable the GSTR-1A toggle on the GSTR-1 Mirror or Reconciliation Engine screen and browse to that folder.
- The engine merges them automatically.

6.5 CMP-08 PDFs

Download from: GST Portal → Login → Services → Returns → Returns Dashboard → Select period → View CMP-08 → Download

- One official filed return PDF per Quarter (April to March).
- All Quarters for the FY must be in the same folder.
- Any filename is fine — the tool reads GSTIN and return period from inside the PDF.
- Use only official portal downloads — not scanned copies or printouts.

6.6 GSTR-4A Excel

Download from: GST Portal → Login → Services → Returns → Returns Dashboard → Select period → GSTR-4A → Download

- Format: Excel (.xlsx) — the standard GST Portal download format.
- One file per quarter — all quarters in a single folder.
- Do not open and re-save these files in Excel before processing.

■ Important Rules — Read Before Running: Do NOT mix files from different GSTINs in the same folder. Do NOT mix files from different Financial Years in the same input folder. Violations will cause incorrect output or processing errors.

7. Understanding Your Output Files

Every successful Reconciliation Engine run produces six Excel workbooks in your chosen output folder, each named with the FY prefix and GSTIN.

File	Sheets	Contents
FY_YYYY- YY_GSTR1_<GSTIN>_Consolidated.xlsx	GSTR-1 & 1A SUMMARY - GSTR 1 SUMMARY - GSTR 1A	One row per month: taxable value, IGST, CGST, SGST, Cess. B2B, B2C, CDNR, CDNUR, HSN, Nil Rated breakdowns. GSTR-1 & 1A sheet is the sum of GSTR 1 and GSTR 1A summaries, which is taken for Reconciliation.
FY_YYYY- YY_GSTR3B_<GSTIN>_Consolidated.xlsx	OUTWARD_SUMMARY ITC_SUMMARY PAYMENT_SUMMARY	Month-wise outward supply figures. Eligible, Ineligible, Reversed ITC. Tax payable and paid via cash/credit ledger.
FY_YYYY- YY_GSTR2B_<GSTIN>_Consolidated.xlsx	RECON_MASTER AMENDMENT_AUDIT RECON_INPUT MONTHLY_SUMMARY MIRRORING OF ALL OTHER SHEETS of GSTR-2B	All supplier-wise ITC entries across all months. Pre-formatted for reconciliation matching. Month-wise aggregated 2B ITC. Amendment Audit — details of Invoices amended during the year. Recon Input — used for Books vs 2B Reconciliation. Details in the sheet are redundant for now.
FY_YYYY- YY_GST_Recon_<GSTIN>_Consolidated.xlsx	TURNOVER_RECON ITC_RECON E-CREDIT LEDGER	GSTR-1 vs GSTR-3B outward supply comparison. GSTR-2B ITC vs GSTR-3B claims. Reconciles E-Credit Ledger balance with Books of accounts.
FY_YYYY- YY_CMP08_<GSTIN>_Consolidated.xlsx	COVER SUMMARY - CMP-08	Quarter-wise outward supplies (incl. exempt), inward supplies under reverse charge, and tax payable. IGST, CGST, SGST and Cess break-up.
FY_YYYY- YY_GSTR4A_<GSTIN>_Consolidated.xlsx	RECON_MASTER AMENDMENT_AUDIT QUARTERLY_SUMMARY PARTYWISE B2B, B2BA, CDNR, CDNRA	All supplier-wise inward supply entries for composition dealers across all quarters. Quarter-wise aggregated ITC. Party-wise supplier summary. Amendment Audit trail for B2BA and CDNRA amendments.

Reading the Reconciliation Workbook

- **TURNOVER_RECON** — Compares GSTR-1 declared turnover against GSTR-3B outward supply figures month by month.
- **ITC_RECON** — Reconciles GSTR-2B ITC against GSTR-3B claims. Excess claims and short credits are flagged.
- **E-CREDIT LEDGER** — Reconciles the E-Credit Ledger balance with Books of accounts. Helps identify mismatches between ITC claimed and credit ledger.

8. Module Reference — Every Screen Explained

8.1 Startup / Session Screen

The first screen after every launch displays up to 12 most recent client sessions i.e 5 sessions in the Recent sessions table, sorted by last used, and the balance 7 sessions in the dropdown. So the right client is always one click away.

- **Recent Sessions List** – Each row shows the client name, Financial Year, GSTIN, and the date it was last opened.
- **More Sessions Dropdown** –For the remaining 7 sessions, Client's name and FY will be shown.
- **Open** — Loads the selected session and navigates to the Main Menu.
- **New Session** — Opens a Financial Year selector to begin a fresh session for a new client. Existing sessions are not affected.
- **Older sessions** — If more than 12 sessions exist, the remaining clients are accessible via the Change Client / FY screen at any time, which can be accessed by clicking the New Session button. Session data is stored locally on the device; nothing is sent anywhere.

8.2 Main Menu

The central hub. All major functions accessible from here.

- **Mirror Engines** — Opens the engine selection submenu.
- **Reconciliation Engine** — Runs the complete pipeline in one go.
- **Change Client / FY** — Switch clients, change FY, or edit folder paths.
- **Help / About** — Opens the manual and support information.

8.3 Mirror Engines Submenu

REGULAR SCHEME

- **GSTR-1 Mirror** — Processes GSTR-1 PDFs → SUMMARY 1&1A + GSTR – 1 Summary + GSTR – 1A Summary
- **GSTR-3B Mirror** — Processes GSTR-3B PDFs → OUTWARD + ITC + PAYMENT.
- **GSTR-2B Mirror** — Processes GSTR-2B Excel → RECON_MASTER + AMENDMENT AUDIT + PARTYWISE + MONTHLY SUMMARY etc.

COMPOSITION SCHEME

- **CMP-08 Mirror** — Processes CMP-08 PDFs → QUARTERLY SUMMARY + QUARTER_WISE.
- **GSTR-4A Mirror** — Processes GSTR-4A Excel → RECON_MASTER +QUARTERLY_SUMMARY + PARTYWISE.

8.4 Reconciliation Engine Screen

- **Mode selector** — Choose full run or Reconciliation-only.
- **Folder inputs** — GSTR-1, GSTR-3B, GSTR-2B, CMP-08, GSTR-4A, and output folders on one screen.
- **GSTR-1A section** — Expands when amendment PDFs are needed

8.5 Change Client / FY Screen

- **Current session strip** — Shows active client and FY at the top.
- **Change FY** — Switch to a different year for the same client.
- **Search box** — Instantly switch to any saved client session by searching for earlier sessions.
- **New Session** — Create a fresh client with a new FY.
- **Edit paths** — Update input or output folder paths without re-running.

9. Common Errors & Solutions

If you encounter an issue not listed below, contact support with a screenshot and the log file from **C:\Program Files\GST Recon Tool\logs**

Error / Warning	Cause & Fix
"Windows protected your PC" on double-clicking setup	Cause: Installer not code-signed. Fix: Click "More info" then "Run anyway". File is safe.
Tool does not open after clicking shortcut	Cause: Incomplete installation or antivirus blocked it. Fix: Right-click shortcut → Run as Administrator. Or add antivirus exclusion for C:\Program Files\GST Recon Tool\
"Warning — missing months" in progress log	Cause: One or more monthly files missing from input folder. Fix: Click Yes to continue, or download the missing month and re-run.
"Mixed FY detected" in progress log	Cause: Input folder contains files from more than one FY. Fix: Create separate folders per FY.
Reconciliation file not produced	Cause: One or more consolidated files missing. Fix: Re-run the missing engine individually via Mirror Engines.
Output Excel cannot be opened / shows corrupt	Cause: File was open in Excel when tool tried to write. Fix: Close the file in Excel and click Run again.
GSTIN not detected / Trade Name shows blank	Cause: PDF is non-standard or scanned. Fix: Use only official filed return PDFs from the GST Portal.
"Permission denied" when saving output	Cause: Output folder is protected or OneDrive locked the file. Fix: Choose output folder on Desktop or in Documents.
Screen appears blank / all black on startup	Cause: Display scaling mismatch on high-DPI monitors. Fix: Right-click shortcut → Properties → Compatibility → Change high DPI settings → Override → Application → OK.

10. Uninstalling the Tool

The tool can be uninstalled through any of the following methods:

- Windows Settings → Apps → search 'GST Recon Tool' → Uninstall.
- Control Panel → Programs → Programs and Features → 'GST Recon Tool' → Uninstall.
- Start Menu → GST Recon Tool folder → 'Uninstall GST Recon Tool'.

■ Your Output Files Are Safe — Uninstalling the tool does NOT delete your output Excel files. All generated workbooks remain exactly where you saved them.

11. Contact & Support

If you encounter an issue not covered in Section 9, please reach out with:

- Copy the progress log and Paste the entire log in a Notepad or in the e-mail's body.
- The Financial Year and return type being processed.
- The log file from: C:\Program Files*\GST Recon Tool\logs\ (e.g. log_20260412_160036.log).
* If the tool is downloaded in the Program files.
